To the ANC 1D it is very sad the way some member of this ANC is acting regarding our petition for a loading zone some of you have even got near to attack us fiscally even though that we have been respectful to you all .regarding dos gringos signature it was my understanding that the general manager signed the petition and by law the general manager in the absence of the owner he can make the decision for the business in the absence of the owner and is legally binding. Personally I regret that we have that signature in our petition specially knowing that some ANC members would feed on it but you have to understand that we are not doing this for pleasure but for a business need. Going forward since that some of you don't believe that these signatures are legitimate we invite you all to walk with us to all of this business and confirm that these businesses really support the loading zone. Regarding the petition signature we handed it to commissioner jack McKay on march the 2<sup>nd</sup> informal meeting at front of all the commissioner present we were surprised that he didn't mention them in any of ANC 1D meeting when our case was brought it up to let the attendees or the other commissioners know that we had the other business support for the loading zone in the petition he had these signature in his possession for over month until we requested back on April 6<sup>th</sup> also we were thinking that given the concern that some commissioner have expressed for parking loose by adding one more loading zone to serve two blocks would this commissioner support to recommend DDOT to spread the 5 loading zone that are in the 3200 block of mount pleasant spread them to the 3000 and to 3100 block so that the 3200 block can have more parking because we need more loading zone in our block because most of our customer come in by walking biking or using public transportation and the loading zone will serve the service people and deliveries also the musician will benefit big because they are getting big ticket some times for \$100 \$500 even \$1000 for using the bus stop for loading and unloading their instrument and if the ANC1D doesn't care for this people that they are barely making few backs by playing at our restaurant that usually is for fundraising then who are you willing to help ?this people need your help and you are not going to lose money by supporting the loading zone instead by supporting it you are helping many people and many businesses get relief and if we get the 5 loading zone that already exist in the 3200 block of mount pleasant to be spread to the lent of mount pleasant no body lose it will be business wise decision by this ANC so please don't take our petition as a insult to the ANC we are just following the due process we want to be transparent to our community by attending and requesting support from the ANC and we are not asking this ANC to do anything illegal we are asking to do the right thing so please don't try to do this process to be more difficult. you most know that we will get this loading zone even if we have to suit people in mount pleasant people that are interfering with due process by abusing their position in government office thank you all

Hydee and Mario
